MEMORANDUM FOR: Chairman, COMOR

SUBJECT: Evaluation of [REDACTED]

25X1

1. This memorandum is for your information.

2. Review of [REDACTED] indicates that the target coverage was insufficient for evaluation of possible Chinese buildup in South China. The mission did not cover any targets west of NAN NING and 16 of the 21 highest priority targets pertinent to such a buildup are located west of NAN NING. Photography was attempted on 4 of the 5 highest priority targets in the area east of NAN NING, but effective coverage was obtained on only one - the SHU CHANG Supply Depot. Clouds obscured most of the other three. No unusual activity was noted at SHU CHANG.

3. Nineteen installations were read out from the mission, including 16 COMOR targets, 6 of which were mostly cloud covered. Usable photography covered 4 airfields, 4 military barracks or supply areas, 4 naval bases or ports [REDACTED]. Significant results include negation of a suspect submarine base on NAO CHOU TAO Island, and evidence of considerable construction activity [REDACTED] at an airfield south of NAN NING.
